

Presenting the latest in Functional and Eco Fabrics, Monofilaments Yarns, TPU, Reflective Trim & Chemicals from Taiwan

For the 5th consecutive year, the Taiwan Textile Federation (TTF) and Bureau of Foreign Trade (BOFT) are forming the Taiwan Pavilion @ Technotex 2017 to be held at Bombay Convention & Exhibition Centre (BCEC) from 12-14 April, 2017 in Mumbai. The 6th edition of Technotex – an international exhibition and conference on Technical Textiles is organised by the Ministry of Textiles, Government of India and FICCI.

Taiwan pavilion @ Technotex will showcase and promote world-class textile pioneers from Taiwan with their latest innovations and technology to offer to Indian buyers of technical textiles. The Taiwanese companies are optimistic to connect with potential customers, meet existing clients and network with industry peers visiting this important trade platform from across India.

Taiwan has a strong reputation for technical textile development, design talent and flexibility to meet market's fast-changing demand and their products offer better performance while performing complex functions in the form of smart fibres and applications of nanotechnology. On the other hand, the Indian technical textiles industry is still an emerging area of investment and there is immense potential that lies untapped which the Taiwanese suppliers can take advantage of to penetrate and expand their product markets in India.

The global market size of the technical textiles sector is estimated to be around US\$ 145 billion in 2015, and global market demand is expected to grow from 26.58 million tons in 2014 to 35.47 million tons by 2022, growing at a CAGR of 3.7% from 2015 to 2022. However, this sector is still at a nascent stage in India. Based on past trends of growth and estimated end user segment growth, the 'Working Group on Technical Textiles' for the 12th Five Year Plan (FYP) projected the market size to reach US\$ 28.7 billion by 2016-17 at a year on-year growth rate of 20% during 12th FYP.

At Technotex 2017, Taiwanese technical textile suppliers would exhibit a wide range of functional fabrics, mono filaments yarns, eco fabrics, TPU films, reflective trims, water and oil repellent agents, etc. which has applications across multiple industry sectors that ranges from the sports to outdoor & rainwear, life style and eco-friendly, shoes and baggage, medical and hygiene and advanced materials for Automotive, Electronics, Optical and Safety products.

Mr. Sean Tsai from Taiwan Textile Federation said, "We have been forming a group pavilion at Technotex since 2011 to promote Taiwan's world-class innovative and quality textiles. India's growing demand and consumption for technical textiles is creating immense opportunities for Taiwanese companies to tap new business here. Our cutting-edge products across industry verticals are a perfect match for Indian companies and institutional buyers. We are sure our participation @ Technotex 2017 would be successful."

Visit the Taiwan Pavilion to source the finest of functional and technical textile products at Technotex-2017.
